Conclusion

What is forests?

Forests are large areas covered with trees, plants and animals living together.

Forests give us oxygen, rain, food, medicine and homes for wildlife. Cutting too many trees causes floods, soil loss and climate change.

Picture of forests

DID YOU KNOW?

Amazing facts

31%

of Earth's land is forest

80%

of land animals live in
forests

1 tree

can absorb ~20 kg CO₂ a
year

Layers of a forest

Canopy

Tall trees form a roof.

Understorey

Shrubs and young trees.

Forest floor

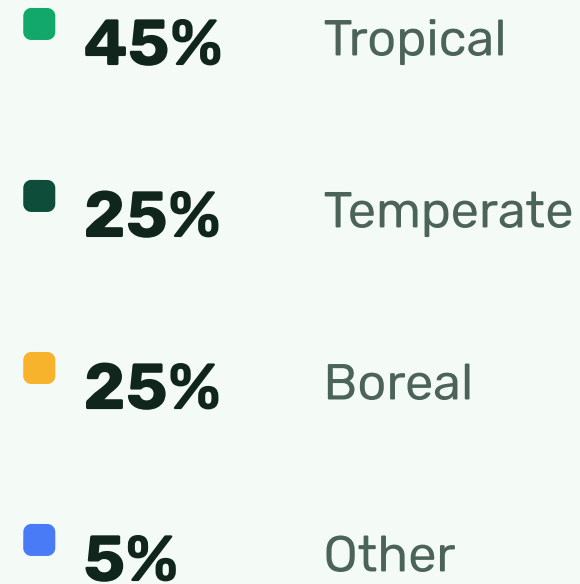

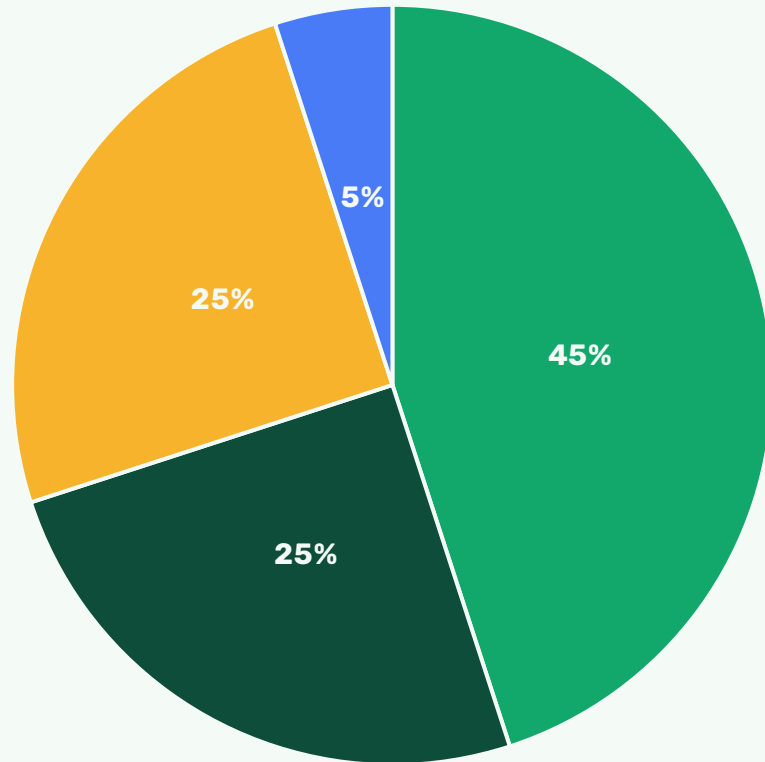

Leaves, fungi and insects.

How forests help

IN NUMBERS

Forest cover by type (sample)

Sample data for illustration.

Our activity

- Collect fallen leaves from three trees
- Press them in a notebook
- Label each with its tree name
- Make a class leaf chart

Image

Forest vs city

Forest

- Cool and shady
- Clean air
- Rich wildlife

vs

City

- Hot concrete
- Polluted air
- Few animals

What we can do

Plant a tree

On your birthday every year.

Save paper

Use both sides.

Spread awareness

Tell friends why trees matter.

Portrait image

//

*The best time to plant a tree
was 20 years ago. The
second best time is now.*

— A popular proverb

Thank you!

Let's protect our green friends!
