

WORKSHOP

2026 Web Development in 2026

Modern tools for fast, accessible websites

Agenda

01 Introduction

02 Architecture

03 Trends

04 Adoption

INTRODUCTION

01

**A great website is fast,
accessible and easy to
change.**

Why it matters

Overview

- Websites today are apps as much as pages
- Frameworks handle routing, data and rendering
- Performance and accessibility are essential
- Static and server rendering are back in favour

KEY IDEA

**Ship less
JavaScript; your
users will thank
you.**

ARCHITECTURE

02

How it works

Design

Mobile-first layouts

Build

Components and pages

Test

Speed and accessibility

Deploy

Global edge hosting

Core components

Front end

HTML, CSS, components.

Back end

APIs and databases.

Hosting

CDNs and edge functions.

Tools and options

Layer	Popular choices	Notes
Frameworks	Component frameworks	Pick one and go deep
Styling	Utility CSS, design tokens	Consistent UI
Hosting	Static and edge platforms	Fast everywhere

Generic examples; pick what fits your project.

TRENDS

03

Adoption over time

Adoption keeps rising as tools mature (sample data).

Sample data for illustration — replace with your own figures.

Use cases

Image 1

Business sites

Fast, findable pages

Image 2

Web apps

Dashboards and tools

Image 3

E-commerce

Stores that convert

ADOPTION

04

Benefits and risks

Benefits

- ✓ Reach every device
- ✓ Instant updates
- ✓ Huge ecosystem

Risks

- Tooling churn
- Performance pitfalls
- Accessibility often ignored

Best practices

Mobile first

Design for small screens.

Measure speed

Check core web vitals.

Use semantic HTML

Accessibility by default.

Getting started roadmap

Week 1

Learn

Core concepts and a tutorial

Week 3–4

Pilot

One real use case

Week 2

Prototype

Small proof of concept

Month 2

Scale

Standards, monitoring, training

Questions?

Thanks for your time.
