The Admissions Committee
Graduate Programme in Data Science
University Name

Subject: Letter of recommendation for Ms. Student Name

Dear Members of the Committee,

It is my pleasure to recommend Ms. Student Name for admission to your graduate programme in Data Science. I have known her for three years as her teacher for Data Structures and Machine Learning, and as the guide for her final-year project.

She ranked among the top five students of a class of 120 and stood out for her curiosity and persistence. Her project on crop disease detection using convolutional neural networks was well designed, carefully evaluated and clearly written.

She works well in teams, communicates clearly and takes feedback seriously. I am confident she will be an asset to your programme and recommend her without reservation.

Yours sincerely,

Dr. S. Banerjee

Associate Professor, Computer Science
