Students Shine at National Hackathon

A team of four third-year students won second place at a national student hackathon with an app that helps small farmers track crop prices and weather alerts.

The team thanked their mentor and the department's innovation lab for late-night support.

Hackathon awards

Guest Lecture on Cloud Computing

Industry practitioners spoke about building scalable systems and careers in cloud engineering.

Faculty Achievements

Two faculty members published papers in peer-reviewed journals, and one received a research grant for work on edge AI.

Build things that solve real problems, and you will never run out of motivation.

— Head of Department

Placement Update

Pre-placement talks for the final-year batch begin in July. Students should update their resumes on the placement portal.

Coding Club

The coding club conducted weekly contests with over 150 participants.

Spotlight: Ananya Kulkarni

Final-year student

Ananya's research on lightweight neural networks for crop disease detection was accepted at a student conference.

Upcoming

Date	Event	Where
20 May	Project expo	Main block
5 Jun	End-semester exams begin	Exam halls
1 Jul	Summer internships begin	—

Notices

Project reports due on 15 May. • Library books to be returned before exams.

Alumni Talk

An alumnus working in product management shared tips on internships and interviews.

Lab Upgrade

The AI lab now has new GPU workstations for final-year projects.
