

Rohan Kulkarni

Software Engineer

+91 99887 66554 · rohan.kulkarni@email.com · Hyderabad, India · github.com/rohankulkarni · [rohan.codes](#)

01 Profile

Backend engineer with 5 years building reliable, well-tested services in Go and Python. I care about clean APIs, calm on-call rotations and writing docs that the next engineer thanks me for.

02 Experience

2022 — Present ·
Hyderabad

Software Engineer II

[Orbitra Software](#)

- Own the payments reconciliation service processing 2 million events a day.
- Reduced p95 API latency from 480 ms to 120 ms by redesigning the caching layer.
- Led migration of 14 services to Kubernetes with zero customer-facing downtime.
- Introduced contract testing, cutting integration bugs by roughly half.

2020 — 2022 ·
Bengaluru

Software Engineer

[Nimbus Cloudworks](#)

- Built internal tooling for deployment approvals used by 300 engineers.
- Wrote the incident runbook template now standard across the org.

2019 ·
Chennai

Engineering Intern

[Tidewater Logistics](#)

- Prototyped a route-optimisation service that saved 7% fuel in a pilot city.

03 Education

B.E., Information Technology

2016 — 2020

[Deccan Valley University](#) · CGPA 8.9 / 10
